UNITED WAY LUBE 68 (ISO 68)

United Way Lube 68 is premium-quality lubricant specifically formulated to satisfy the requirements of medium size machine tools and flood applications in large machines. United Way Lube 68 is formulated from high-quality base stocks combined with additives that provide good stick-slip friction characteristics, adhesiveness, foam resistance, metal wetting and lubricity. United Way Lube 68 has been optimized to maximize separability from aqueous coolants in coolant systems while minimizing the corrosive effects of high pH coolants on lube surfaces.

Typical Inspection Characteristics

United Way Lube 68

Viscosity @ 100°_F SUS	325-375
Specific Heat @ 100°F	0.48
Flash Point, COC F	320
API Gravity @ 60° F	27
